RAJESH VARMA

rajesh.varma@example.com | +91 98765 43210 | Bengaluru, India | github.com/rajeshvarma

PROFESSIONAL SUMMARY

Backend Engineer with 5+ years of experience designing scalable REST APIs, microservices, and r
obust database systems using Python, FastAPI, Django, and PostgreSQL. Proven track record of improving system throughput

TECHNICAL SKILLS

- Languages & Frameworks: Python, FastAPI, Django, Flask, SQL, HTML/CSS
- Databases & Storage: PostgreSQL, MySQL, Redis, MongoDB
- DevOps & Cloud: Docker, Git, CI/CD (GitHub Actions), Linux, Nginx
- Concepts: Microservices, REST APIs, System Design, Unit Testing (pytest)

EXPERIENCE

Senior Software Engineer — TechNex Solutions *Jan 2023 – Present* | *Bengaluru*

- Architected high-throughput order processing engine handling 50,000+ daily orders with FastAPI.
- Designed asynchronous task processing pipeline using Celery and Redis, reducing latency by 42%.
- Optimized PostgreSQL database queries, indices, and connection pooling to resolve production bottlenecks.

Backend Software Developer — CloudMatrix Infotech *Aug 2020 – Dec 2022* | *Bengaluru*

- Developed modular RESTful microservices in Python (Flask/Django) integrated with third-party payment APIs.
- Implemented secure JWT authentication and RBAC for multi-tenant SaaS application.
- Authored comprehensive unit and integration test suites with pytest achieving 88% test coverage.

KEY PROJECTS

Distributed Inventory Synchronization Engine:
Built an event-driven inventory reconciliation service using Python and Redis Pub/Sub ensuring consistency.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science | VTU Bengaluru (2016 - 2020)
